APPLICATIONS

Single-phase steam generator for usage in the professional sector, with a varnished steel body, **unlimited steam autonomy** thanks to the automatic refilling system with an internal water tank (electromechanical water level control system inside the boiler – True Temp™). **Possibility to inject detergent (or hot water) together with steam**. The steam generator's front panel is **equipped with an electric console with commands for a timer, a thermometer and a pressure gauge**; the digital display will advise the user about the necessity to proceed with the boiler maintenance.
